SKILLS

- **Languages:** Java, Python, C++, JavaScript, C, SQL
- **Frameworks/Libraries:** Numpy, Pandas, Matplotlib, Scikit-Learn, PyTorch, Flask, LangGraph, FastAPI
- **Technical Expertise:** Machine Learning, OS, CI/CD, Feature Engineering, Data Preprocessing
- **Tools/Platforms:** MySQL, Git, GitHub, Docker, AWS EC2, Streamlit
- **Soft Skills:** Problem-Solving, Adaptability, Quick Learner

PROJECTS

AI-Assisted Autonomous CI/CD Orchestration Platform | [GitHub](#) May 2026

- Architected a full-stack CI/CD orchestration platform using 3 Spring Boot microservices, a Python Flask AI engine, MySQL, and a custom Nginx API Gateway for seamless service communication.
 - Built a Jenkins CI/CD pipeline with AI-driven analysis of Docker container metrics (CPU, RAM, restart counts), enabling automated rollback and improved deployment reliability.
 - Deployed the platform on AWS EC2 (t3.micro) using Docker, Docker Compose, and custom Dockerfiles, while developing a responsive HTML/CSS/JavaScript dashboard for real-time monitoring.
- Tech:** Java, Spring Boot, Python, Flask, Jenkins, Docker, Docker Compose, AWS EC2, MySQL, Nginx, HTML5, CSS, JavaScript

AI-Powered Autonomous Support Resolution Agent | [GitHub](#) Apr 2026

- Designed an autonomous AI support agent using LangGraph, enabling multi-step reasoning and dynamic tool chaining to process and resolve **20+** support tickets end-to-end, reducing manual intervention by **~70%**.
 - Implemented scalable backend logic using Python, FastAPI, and Asyncio, supporting concurrent processing of multiple tickets with retry mechanisms and error handling, improving system reliability by **~40%** under simulated failures.
 - Integrated and deployed the system with Streamlit UI and FAISS-based semantic search, achieving real-time response generation (**<2 seconds**) along with audit logging of 100% decision traces for explainability.
- Tech:** Python, LangGraph, FastAPI, StreamLit, FAISS, OpenAI API, Asyncio, Docker

Product Purchase Predictor | [GitHub](#) Jun 2025 - Jul 2025

- Preprocessed customer dataset using scikit-Learn, resolving **100%** of missing values and normalizing features, which optimized model performance by **20%** and reduced prediction error by **25%**.
 - Applied ML for accurate prediction based on parameters such as age, gender, ads clicked, previous purchases, and time spent, achieving an **88%** and **84%** accuracy rate.
 - Ensured an intuitive and visually appealing web-based application using Streamlit and integrated HTML5.
- Tech:** Python, HTML5, ML predictive analysis, Streamlit

TRAINING

Cipher Schools (Edtech Company) | [Certificate](#) Jun 2025 - Jul 2025

Machine Learning with Data Science

- Performed EDA with Numpy and Pandas to extract user-behaviour patterns and improve preprocessing.
- Trained and evaluated multiple classification models, including Logistic Regression, Random Forest, using Scikit-learn, resulting in a **12–20%** lift in predictive accuracy across experiments.
- Engineered customer behaviour features (browsing time, clicks, purchase history) and built a probability-based pipeline to identify high-intent customers for targeted e-commerce marketing.

CERTIFICATION

- Data Analytics with Python | [NPTEL](#) Apr 2025
- Unveiling Basic Python towards ML/AI | [CSE Pathshala](#) Jul 2024
- Legacy Responsive Web Design | [FreeCode Camp](#) Dec 2023

ACHIEVEMENTS

- Solved 550+ Questions on all the platforms | [Codolio](#) Jul 2026
- 3 - star in Python on HackerRank Jan 2025

EDUCATION

- **Lovely Professional University** Punjab, India
Bachelor of Technology - Computer Science and Engineering; **CGPA: 7.57** Aug 2023 - Present
- **Gyan Kunj Academy** Uttar Pradesh, India
Intermediate; **Percentage: 74** Apr 2020 - Mar 2022
- **Gopal Ji Memorial** Uttar Pradesh, India
Matriculation; **Percentage: 75.2** Apr 2019 - Mar 2020
